COMMUNITY PROGRAMS

FOREWORD

From times of the great depression until the late 1960's, rural America suffered from the debilitating effects of outmigration, decline of smaller towns, and obsolete or inadequate housing and community services. Millions of people who left the farm could find no other way to earn a livelihood in their home areas. Young people were attracted to cities where they hoped for better career opportunities and more modern advantages of living.

Now, a massive effort is under way to restore balance between the options for urban or rural living, as the American family may prefer. "Rural development" has become a major national commitment. Evidence of its progress is more and more visible as rural communities introduce city-style utility services, modernized housing, diversified new business and industry, and other amenities equal to those enjoyed by urban dwellers.

Prime responsibility for Federal support of rural development has been vested by Congress in the Department of Agriculture. The Farmers Home Administration, a USDA credit agency, has become the principal Federal lender for building projects other than rural electrification that bear the rural development label.

FmHA's role as a community service agency has evolved from its long experience in delivering credit and technical assistance directly to rural people through county loan offices.

The agency was created in 1936 to administer programs of rehabilitation for distressed farmers, then was enlisted in the late 1930's to help finance drought-resistant farm water and irrigation systems in Western States. In the 1950's, the water program was made nationwide, and nonfarm people of agricultural communities were permitted to tap onto the farm system lines for household and business water supply.

In 1961, Congress fully converted the water program from "agricultural" to "rural community" classification. Sewer systems were added in 1965. Since then, the service jurisdiction has been extended to include towns of up to 10,000 population. Thousands of rural towns and countryside areas, long burdened with unreliable wells or other shortcomings of water supply and waste disposal, have taken advantage of the FmHA program to equip themselves with up-to-date water and sewer systems.

Except for a program in the 1960's to help develop outdoor recreation centers, FmHA's financing of rural community facilities was limited to the water-sewer program until passage of the Rural Development Act of 1972. That legislation designated FmHA to administer loans for other kinds of public facilities needed to round out essential services in rural communities. Now, fire departments, hospitals, nursing homes and other health care facilities, community centers, city halls, schools and libraries, as well as public recreation centers, are among the types of projects financed through FmHA loans.

The data provided in this report reflects the year-by-year development and expansion of these community facility programs. Records for years prior to the 1970's were compiled by Harriet M. Kelly and Arlene Wilson, now retired, who served as agency statisticians from the 1930's until the 1970's and preserved the statistical history of early-day FmHA program accomplishments. The results of their painstaking and dedicated efforts are now a part of computerized records established in recent years by the FmHA Management Information Staff.
